

STRENGTHENING PRIMER FOR 3D PRINTING PARTS

AFINITICA® 3D Fix is a cyanoacrylate adhesive designed specifically for the priming and hardening of 3D printed gypsum parts. Due to its high priming depth, it hardens the piece from the inside, increasing its resistance and durability.

The colours are visibly more intense and vibrant. Get a professional and high quality finish. In addition, it can also be used as a coating to provide extra gloss. A complete product to offer the best service for 3D printing.

FEATURES

STRENGTHENING

COAT AND
PROTECT

LOW ODOUR
& BLOOMING
