

PLASTIC PRIMER

POLYOLEFIN PRIMER FOR INSTANT ADHESIVES

AFINITICA® Plastic Primer promotes the adhesion of instant cyanoacrylate adhesives in difficult-to-bond plastics and some elastomers. It is specially suitable for polyethylene (PE), polypropylene (PP) and Teflon (PTFE), as well as thermoplastic elastomers.

FEATURES

SPECIAL
PLASTICS

BRUSH
APPLICATOR

DRIES IN
SECONDS

INCREASE
ADHESION

- Improves adhesion to difficult-to-bond substrates
- Specially formulated for adhesion in polyolefins
- Suitable for use with other cyanoacrylates
- Dries in seconds
- Increases adhesion strength

TYPICAL APPLICATIONS

- Preparation of surfaces
- Bonding of hard-difficult-to-bond plastics and polyolefins
